ETHICS SPOTLIGHT

Authorship, Conflicts of Interest, and AI

One of the most common concerns we hear researchers express are around issues of Authorship. A researcher's career is built on their ideas and contributions to the scholarly record, so it is crucial that authorship has been attributed properly, or that all contributors to an article understand the requirements and responsibilities of authorship.

When that does not happen, it can slow down the publication process, or even result in ethics investigations & retractions.

EVENT DETAILS

12 OCTOBER 2023

3.30PM – 5.00PM (GMT+8)

Registration Link:
